penumarthi.sushmanth@gmail.com | linkedin.com/in/penumarthi-sushmanth | github.com/PenumarthiSushmanth

I am a self-motivated and hardworking fresher with high energy and good communication skills. I want to build my career in Computer science, where I can get the opportunities to prove my abilities by accepting challenges, fulfilling the goals, and climbing the career ladder through continuous learning and commitment.

EDUCATION

Illinois institute of technology, Chicago ***[Jan 2023 – Present]***

Master of Science in Computer Science

BML Munjal University, Gurgaon ***[Jul 2018 – May 2022]***

Bachelor of Technology in Computer Science, GPA: 7.84 / 10.00

RELEVANT COURSEWORK

- Machine Learning
- Big data analytics
- Software engineering
- Operating Systems
- Database Management
- Data Structures
- Computer Networks
- Computer Architecture

PROJECTS

Quantifying the text similarity between citations using NLP ***[Jul 2021 – Dec 2021]***

- Developed a model that shows the similarity rate between a main paper and its citations and helps to know the relevance rate of those references with the main paper.
- Text was extracted using beautiful soup module and then using extractive summarization technique, the text is processed for further steps.

Medical drug prediction ***[Feb 2021 – Apr 2021]***

- Developed a Machine learning model & deployed into web application, which predicts the suitable drug for the patients who are suffering from the same illness.
- The data is analysed and trained with three classification algorithms KNN, Decision tree, and logistic regression.

EatMore ***[Sep 2022 – Oct 2022]***

- Developed a Full Stack Web application that is used to order the food from the fake restaurant named EatMore.
- Implemented this online food delivery application using the web technologies like HTML, CSS, JavaScript, NodeJS, ExpressJS and MongoDB

FarmlyGO ***[Aug 2020 – Nov 2020]***

- Designed an e-commerce android application which helps farmers to sell their product directly to the merchants without taking the help of brokers.
- Implemented the prototype of seller's interface in this application as a project of my academic course named Mobile Architecture and Programming

Domain Asset Finder ***[Feb 2021 – Apr 2021]***

- Built a tool using python library Streamlit, which works like a pentesting framework to gather information from the target domain.
- The information obtained from the target can be used for vulnerability assessment.

EXPERIENCE

Smart Energy Water, Noida – *Product Engineer Trainee* ***[Jan 2022 – Jun 2022]***

- Worked in the Payments team as a Dot NET developer for SCM product in product engineering department.
- Designed the payment module which is used by the end customers to make payments to Utility based companies in the US.

Skill Vertex, Bangalore – *Data science training and internship* ***[Jun 2022 – Aug 2022]***

- Developed a Machine learning classification model that predicts the promotion of the employees in a large MNC.
- Analysed and trained the data with three classification algorithms KNN, Decision tree, and logistic regression.

BML Munjal University, Gurgaon – *Thesis under university faculty* ***[May 2020 – Aug 2020]***

- Worked on a project named "Unsupervised learning approach of fingerprint detection" under our academic faculty Dr. Kiran Khatter.

TECHNICAL SKILLS

Languages: Java, Python, C, HTML, CSS, JavaScript, SQL, NodeJS, ASP.Net

Libraries: React, pandas, NumPy, Matplotlib

Software & Tools: Visual studio, Visual studio code, Android studio, Microsoft Excel, SQL Server Management Studio, MongoDB Compass, Postman tool, PyCharm, Anaconda, Google Collab, Jupyter Notebook

Skills: Full stack web development, Android development, Software development, Data cleaning and analysis, Data visualization, Machine learning, Algorithms

ACTIVITIES AND AWARDS

- Awarded merit scholarship of 75% fee reduction in academic and accommodation by BML Munjal University.
- Certified for the courses "NodeJS" and "MongoDB from Basics to Advanced" which is offered by Infosys Springboard.
- Certified for the course "React - The Complete Guide" from Udemy
- Certified for the course "Machine Learning with Python" which is offered by IBM in Coursera.
- Certified for other MOOC courses like "Python for everybody", "Introduction to SQL", and "Interfacing with Arduino" in Coursera.
- Achieved four stars for java and five stars (Golden Badge) for python in HackerRank.
- Participated in the event in IIT Hyderabad which was organised by the EvolveX team in December 2019.
- Participated in a Game development workshop in my B.tech 2nd year which was conducted by SATA club.
